Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: "porous layer 3" (page 2, line 22) should be "porous layer 2".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,2,5 and 6 are rejected under 35 U.S.C. 102(a) as being anticipated by FR 2,804,313. '313 discloses an applicator comprising an impermeable layer (3), porous foam layer (2) with holes (4) and which layer carries the applied substance. "Optionally" and "possible" are not positive recitations.

4. Claims 1,2,5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Stroop (USP 2,071,365). The patent to Stroop discloses a porous pad (10) with holes (page 1, column 2, lines 23-32) and which carries the applied substance and impermeable layer (26).

5. Claims 1,3,5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kingman (USP 2,110,001). The patent to Kingman discloses an applicator comprising a porous layer (10) which carries the applied substance and further including an

impervious layer (12). The nature of a knitted yarn material would include a plurality of "holes or perforations".

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over FR 2,804,313 in view of GB 2,235,869. '313 discloses the invention substantially as claimed with the exception of specifying the material of the impermeable layer. '869 discloses a similar device and wherein the impermeable layer (5) thereof is made of plastic (page 2, lines 32-33). It would have been obvious to one of ordinary skill to have used such a material as plastics cheap and readily available.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited patents are pertinent to applicator devices.
